

H2Only 12 On Tap

Imagine an abundant source of pure water on tap in your home or office.

The H2Only 12 On Tap produces up to twelve gallons of steam-distilled pure drinking water per day and is equipped with a ten-gallon storage tank. The unit has a built-in demand pump to deliver pure drinking water directly to your kitchen sink, refrigerator, stand-alone dispenser, or other locations as desired. There is also a manual outlet to access pure water directly from the storage tank.

2.5 million plastic bottles end up in U.S. landfills each hour!

That's 60 million bottles a day and 21.9 billion plastic bottles a year. This enormous environmental problem demands that we all reduce our use of disposable bottles. Do your part to reduce waste by installing an H2Only 12 On Tap unit and kick the habit of purchasing single-use bottles!

Internal representation of H2Only 12 On Tap steam-distillation process.

"The pure water service is outstanding. It is very convenient and saves everyone at the Saint Moritz both time and money."

- C.R. Newson, St. Moritz Resident

Distillation & The Hydrologic Cycle:

Just as Mother Nature takes ocean water and converts it to pure rain water, our steam-distillation units mimic the Hydrologic Cycle in the water purification process.

- 1 Water is plumbed directly into the boiling tank from your home or office water supply.
- 2 A heating element boils the raw feed water and steam rises.
- 3 The steam passes into a condensing coil, leaving virtually all impurities and contaminants behind.
- 4 A fan cools the steam and converts it to liquid – pure, steam-distilled water.
- 5 A stainless steel storage tank holds up to ten gallons of drinking water.
- 6 A demand pump delivers the steam-distilled water to a remote dispenser or faucet, refrigerator and/or icemaker.

No more bottled water deliveries!

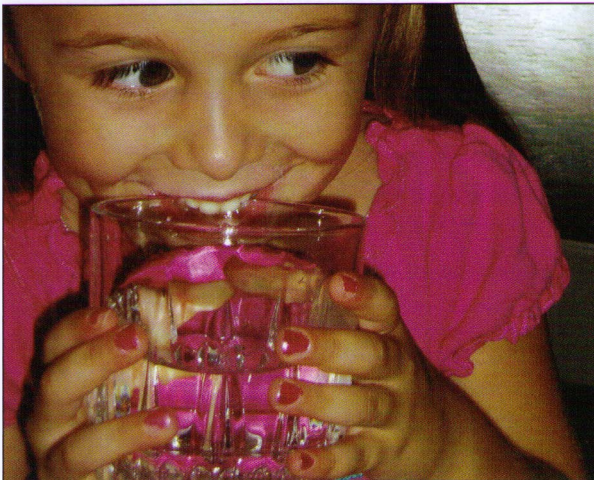

H2Only 12 On Tap

Quality Construction:

The **H2Only 12 On Tap** is constructed of top-quality stainless steel to provide years of dependable service with a minimum of care. The unit is fan-cooled and has a unique float design to stop production when the storage tank is full.

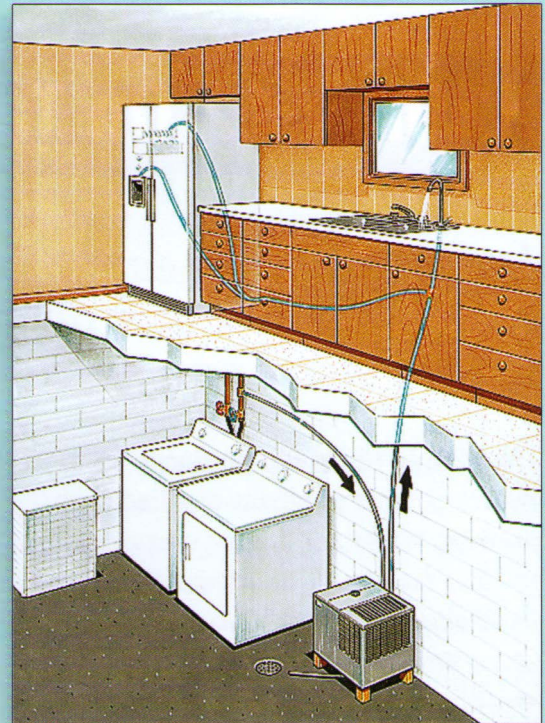

Features include:

- ▶ The **H2Only 12 On Tap** will automatically flush and drain the contaminants from the boiling chamber when the storage tank is full. This maintenance-reducing feature requires that this unit be installed near a drain. Alternatively, for installations that cannot accommodate a drain, the unit can be switched to manual mode with the push of a button.
- ▶ The built-in demand pump of the **H2Only 12 On Tap** delivers pure steam-distilled water where you want it to go. H2Only personnel can customize your system to deliver pure water anywhere in your home or office.
- ▶ Optional stainless steel floor stand for convenient installation of the **H2Only 12 On Tap** unit in a basement or utility room.

*"Distillation provides us with the purest water obtainable... by all means make the smart choice in the type of water you drink. There should only be one choice — PURE!
And pure means distilled."*

**— Harvey & Marilyn Diamond
Fit For Life II: Living Health**

SPECIFICATIONS

Width: 22" (56cm)
Depth: 16" (41cm)
Height: 22" (56 cm)

Shipping Weight: 72 lbs (33 kg)
Machine Weight: 61 lbs (28 kg)

Current Draw (120V): 13.5 amps
Current Draw (240V): 6.75 amps
Total Wattage: 1600 watts

Max. distilling capacity:
12 gallons (45 liter) per day
Storage capacity: 10 gallons (38 l)
Demand Pump: 1.4 gallons (5.3 l) per minute

Ambient Temperature: 50-90 F
Operating Pressure: 30-100 PSI

15 YEAR LIMITED WARRANTY

"Thank you for considering the health concern of Saint Morritz residents."
